COURSE COORDINATOR

Jaqueline Carmona - Speech and Language Therapist, Linguist, Fluency Specialist

APRIL and MAY courses POSTPONED due to COVID-19 containment plan. New dates to be announced soon.

COURSE PRESENTATION

A growing body of evidence supports that children who presented some difficulties acquiring their mother language do not "outgrow" this setback and that "simple" delays in communications may, in fact, be stable predictors of later learning disabilities.

This course provides health professionals with an overview of language development and its repercussion and learning difficulties. It addresses the distinction between language differences and disorders, with emphasis on language-based learning disabilities. As a result of the learning experiences in this course, participants will be more competent in their ability to:

- >> Identify children at risk for language disorder and for learning disabilities
- >> Know the main factors for spontaneous recovery

LEARNING OBJECTIVES >> KNOWLEDGE AND SKILLS TO DEVELOP

- 1 To define and characterize typical and atypical language development and its consequences in learning difficulties**
- 2 To discuss the red flags and benchmarks related to fluency, decoding and reading comprehension**
- 3 To develop knowledge about epidemiological data**
- 4 To analyse the rationale for a referral to Speech and Language Therapy**

TARGET AUDIENCE

Doctors, Nurses, Nutritionists, Psychologists and Technicians of Diagnostic and Therapy with specific interest in this area.

ATTENDANCE REQUIREMENTS

90% attendance is mandatory for issuing attendance certificate and CME credits and/or ECTS

ADMISSION CRITERIA

- >> CV with academic background in the mentioned specialties
- >> Preference will be given to paediatricians.

MAX. ATTENDEES

- >> 30
