HAEMODIALYSIS / VASCULAR ACCESS ADVANCED MODULE

22-P15

COURSE COORDINATORS >> Clemente Sousa, RN, PhD

COURSE PRESENTATION

The Advanced Module of the Haemodialysis Vascular Access Course aims to develop instrumental skills related to the identification of vascular access problems, and simultaneously provide professionals with a space for reflection and discussion.

The course consists of a theoretical and a practical component. The practical component has been designed to enhance skill development related to the physical examination of the arteriovenous access. The aim of this module is that participants acquire advanced skills for managing the care of people who have vascular access ports.

LEARNING OBJECTIVES >> KNOWLEDGE AND SKILLS TO DEVELOP

- >> Develop the ability of decision-making and critical analysis to practical scenarios that focus on the importance of patency for vascular access
- >> Develop new intervention strategies for vascular access, taking into account the new challenges that dialysis care units pose.

TARGET AUDIENCE

Health care professionals with experience/ or interest in haemodialysis.
